

XY-Stage 5102.15

- multi-axis positioning systems possible by simple combination of stages
- high-precision spindle drive with smoothed and tempered spindle (self-locking)
- wear resistant delta bronze spindle nut
- mounting of drive spindle free of play
- use of low-friction guides results in optimum fine adjustment due to high reproducibility of minimum system step distance
- use of stress-relieved, highly resilient materials guarantees high system stability and long life
- robust surfaces through galvanic anodisation
- three precision configurations (**X2** : values on request)

Application specific versions:

- vacuum suitable
- antimagnetic
- radiation resistant
- in black

Maximum load:

A general statement of maximum load and torque capacities is not possible for eccentric forces due to the amount of different configurations.

However, our engineers will gladly calculate the maximum load capacity for your specific application.
