

Z-Stage 5103.D40

- multi-axis positioning systems possible by simple combination of stages
- two high-precision pillar guides mounted on sides guarantee high guidance stability
- high-precision trapezoidal spindle drive with smoothed and tempered spindle (self-locking)
- four spindle lifting gear drives interconnected by a linking shaft
- robust surfaces through galvanic anodisation
- maximum system resolution increased by a reduction transmission
- four height-adjustable feet for table alignment
- two precision configurations

Modularly individually configurable:

- various dimensions available
- from basic model to high-end systems
- to multi-axis systems
- with individual travel range
- with customer-specific hole pattern
