

Encoder

A number of encoder systems of various manufacturers and versions can be integrated into the HUBER positioning systems:

- distance measurement systems
- angular measurement systems
- rotary encoder for step monitoring

The available versions range from simple rotary encoders to complex closed-loop positioners.

Please contact our engineers for further information and advice.

Manufacturer:	Version:
Heidenhain	Distance and angular systems
Renishaw	Distance and angular systems
IVO	Angular measurement systems
