

Cross Slit Screen 3002.10

The beam can be limited both horizontally and vertically by two pairs of blades mounted at right angles to each other. Their motion is symmetrical to the centre of the aperture.

Material:

Housing:	Aluminium*
Blades:	2mm Tungsten*

* other materials available on request

Specifications:

Aperture [mm]:	0-10
Adjustment:	symmetric
Adjustment precision [mm]:	0.02
Parallelity [mm]:	0.02
Weight [kg]:	0.2

Blade geometries:

The following blade geometries are available:

- A)  (Standard)
- B) 
- C)
