

Cross Slit Screen 3002.20

The beam can be limited both horizontally and vertically by two pairs of blades mounted at right angles to each other.

Their motion is asymmetrical to the centre of the aperture.

Symmetrical versions are also available.

Material:

Housing:	Brass*
Blades:	3mm Tungsten*

* other materials available on request

Specifications:

Aperture [mm]:	0-13
Adjustment:	asymmetric*
Adjustment precision [mm]:	0.02
Parallelity [mm]:	0.02
Weight [kg]:	0.3

* optional: symmetric

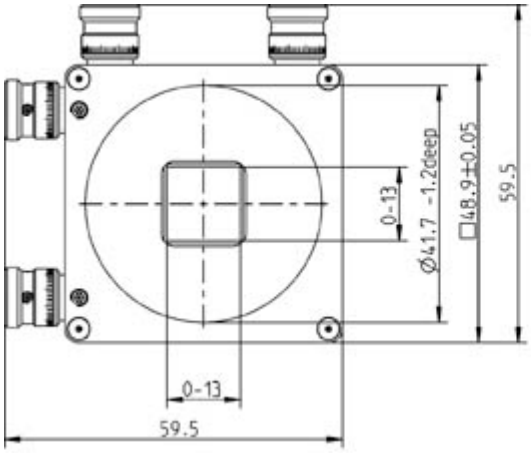

Blade geometries:

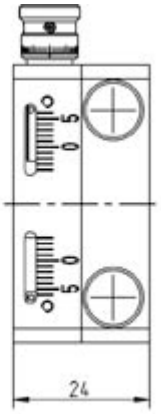

The following blade geometries are available:

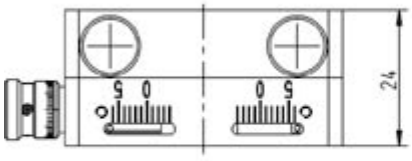

A)  (Standard)

B) 

C)
